## **Note 1. Nature of Business and Operating Environment**

Everest Broadband Networks, Inc. (the "Company") was incorporated in the State of Delaware on August 26, 1999. The Company is in the development stage since it has not generated significant revenues. The Company was formed to provide broadband communications infrastructure within commercial and residential apartment buildings, hospitality suites and shopping centers. These infrastructures will principally focus on the integration of high-speed Internet access, Telephony, and other value-added applications with around-the-clock technical support.

## **Note 2. Summary of Significant Accounting Policies**

Cash and Cash Equivalents: The Company considers all highly liquid investments purchased with an original maturity date of three months or less to be cash equivalents. Cash equivalents consist primarily of money market accounts.

Stock-Based Compensation: The Corporation accounts for stock-based compensation in accordance with Accounting Principles Board Opinion No. 25, "Accounting for Stock Issued to Employees", ("APB No. 25"). No compensation is recorded for stock options or other stock-based awards to employees that are granted with an exercise price equal to or above the estimated fair value per share of the Company's common stock on the grant date. The pro forma effect of recording stock-based compensation at the estimated fair value of awards on the grant date, as prescribed by Statement of Financial Accounting Standards No. 123, "Accounting for Stock-Based Compensation", ("SFAS No. 123"), is disclosed in Note 7.

Use of Estimates: The preparation of financial statements in conformity with generally accepted accounting principles requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting period. Actual results could differ from those estimates.

Property and Equipment: Property and equipment consists of office furniture, office equipment and computer equipment recorded at cost. Depreciation is recorded using accelerated methods, except for leasehold improvements, which are depreciated using the straight-line method over the appropriate term of the lease. The estimated useful lives of the assets as follows:

	Years
Furniture	7
Office equipment	7
Computer hardware and software	3
Leasehold improvements	4.2

## **Note 5. Preferred Stock, (Continued)**

Each share of Series A Preferred Stock is automatically converted into shares of common stock, at the then effective conversion rate, upon the closing of a sale of common stock, at a price of at least \$10.00 per share, in a public offering, pursuant to an effective registration statement under the Securities Act of 1933, as amended, resulting in at least \$15,000,000 of gross proceeds to the Company.

In the event that the assets of the Company are insufficient to permit payment of the above mentioned amounts, then the entire assets and funds of the Company legally available for distribution shall be distributed ratably among the holders of the Series A Preferred Stock in proportion to the preferential amount each such holder is otherwise entitled to receive.

In October and November 1999, the Company amended its Certificate of Incorporation increasing its authorized 3,500,000 shares of its \$0.01 par value Series A Convertible Preferred Stock to 6,075,000 shares. ## **Note 7. Stock Options**

During 1999, the Company's Board of Directors approved an Incentive Stock Option Plan (the "Plan") whereby 4,000,000 shares of common stock have been reserved for options to employees and consultants at terms and prices to be determined by the committee designated by the Board of Directors to administer the plan. The plan specifies that the exercise price of incentive stock options cannot be less than 100% of the fair market value of the stock on the date of grant. The maximum term for options granted is 10 years. Options granted under the plan vest over various periods ranging from 1 to 47 months and may be exercised at various dates ranging from November 1, 1999 through ten years after the grant date.

The combined activity for the plan is presented in the following table:

	Shares	Weighted Average Exercise Price Per Share
Outstanding August 26, 1999	-	\$ -
Granted	2,941,176	0.34
Exercised	-	-
Forfeited	-	-
Expired	-	-
Outstanding, December 31, 1999	2,941,176	\$ 0.34
Exercisable, December 31, 1999	225,938	\$ 0.34

The outstanding options have an exercise price of \$0.34 per share with a weighted average remaining life of 9.8 years.

Measuring compensation cost based on the fair value at the grant dates for awards under the plan consistent with SFAS No. 123 would have increased the net loss, on a proforma basis, by approximately \$59,000. The fair value of options was estimated using the minimum value method with the following assumptions: expected life (5 years); interest rate (6.66%); no volatility and no dividend yield.

## **Note 8. Lease Commitment**

The Company has a one-year lease for office space, which is due to expire September 2000. The remaining commitment under the lease is approximately \$136,000. Rent expense under the lease was approximately \$41,300 for the period ended December 31, 1999.
